Products

- Calcarenite Department

Note: All products are wet products and some images show it dry

X 10 magnification

Amendement Calcaire 0-100µm

Large surface area, with most particles being below 75µm (like flour when dried). When wet it is sticky with the product hardening when dry needing to be crushed again for application. Reintroduction to water can ease distribution for pH control.

Product uses

- Pottery
- pH control for plant growth
- Water tight flooring
- Smooth wall finishing

X 10 magnification

Dust sand 0-300µm

Small reactive surface area, thus making it less reactive in the short term although liming is achieved in the long run. It is less sticky though crushing may be required for even distribution. This product is a low cost solution to liming. It is also used in construction for a fine finish.

Product uses

- pH control for plant growth
- Plastering
- Flooring

X 5 magnification

Fine sand 100µm-300µm

The product is non-stick meaning that there exists little to no clay size particles in the sand. The particles are still very small and smooth to the touch. The product is also semi-permeable.

Product uses

- pH control for plant growth
- Plastering
- Flooring
- Children play ground/ sand pit
- Beach volleyball
- Grass topdressing
- Artificial grass

X 5 magnification

Sand 100µm-2mm

This sand has a wider particle distribution and is semi permeable. The particle distribution allows for a broad product application.

Product uses

- pH control for plant growth
- Plastering
- Flooring
- Building
- Animal feed
- Beach top dress for sun beds
- Concrete blocks
- Grass topdressing
- Sand pathways

Sand 300µm-2mm

This sand product lacks small particles below 300µm which normally restrict drainage of water. The product is permeable and non-stick.

Product uses

- pH control for plant growth
- Plastering
- Flooring
- Golf course (85% USGA standard)
- Construction
- Grass field drainage
- Pavement filler sand
- Beach top dressing

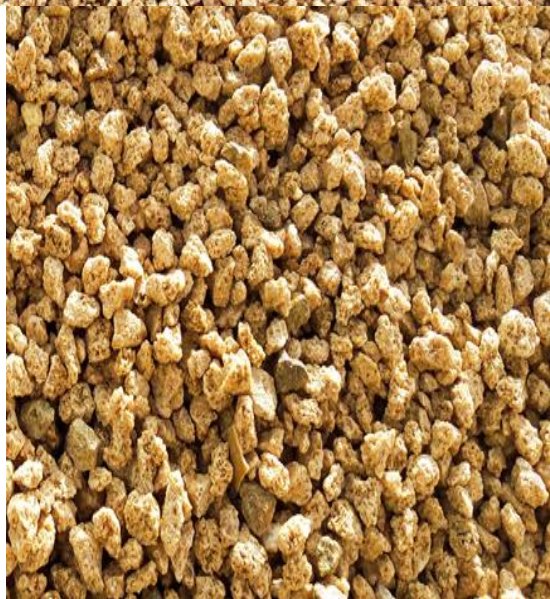

Granule beige 2-4mm

Suitable raw material for animal feed as a source of Calcium. The properties of the quarry show a Calcium rich source while also being safe for animal consumption.

Product uses

- Animal feed- Chicken, Deer, Cattle, Dogs
- Interior decoration
- Window seal decoration
- Filtering tank for sewage
- Fish tanks

Granule beige 4-10mm

This product is popular with landscapers as it provides a nice finish as a complimentary product.

Product uses

- pH control for plant growth
- Zen landscaping
- Paving block filler
- Pathways and driveways
- Pots and flower bed topdressing
- Fish tanks
- Drainage
- Relaxation areas

Granule beige 10-16mm

This is the largest product variety we offer at the moment and it is popular with landscapers, large construction companies and hotels, as it provides a nice finish. This is a complimentary product.

Product uses

- pH control for plant growth
- Zen landscaping
- Pathway and driveways
- Pots and flower bed topdressing
- Fish tanks
- Drainage
- Drive ways
